

Happy Farmer™ Kitchen Composter

with *SCD Efficient Microbes (EM)*™

Recycle waste into something wonderful! This unique, odorless indoor composting system allows you to recycle kitchen waste into an organic soil enhancer year round. With Happy Farmer Bokashi activator, this complete system allows families to produce compost in 2-4 weeks.

Unique Features

Convenient – Reduces the need for an outside compost pile and is easier to maintain than worm boxes. Stores neatly under kitchen sink for easy access.

Large Capacity – The Happy Farmer™ Kitchen Composter can hold approximately 5 gallons of food waste, making it perfect for any size household.

Air Tight Lid – Ensures an ideal environment for anaerobic fermentation to take place, while controlling odors and deterring flies.

Plastic Strainer & Spigot – Placing the plastic grate inside the bucket and then piling food waste on top of it separates the food waste from the liquid that accumulates at the bottom of the bucket. This liquid can be easily drained through the spigot and used as a nutrient-rich fertilizer for houseplants and garden.

Available in Black, White, and Tan

Black and white buckets are made from 75% recycled plastic and all colors are manufactured with SCD EM inside the plastic.

Compost *Meat, Bones, Dairy and Food Scraps* right in your kitchen !

- Process food waste without putrefaction or bad odors.
- Produces a liquid compost tea you can use in houseplants, drainage systems, compost toilets & septic systems.
- Produces a pre-compost product ready to bury in the garden after only TEN DAYS after the bucket is filled. After planting, compost will be converted to rich topsoil in about one month.
- Meets the nutrient requirements of plants with 1/5 or less of the normal volume of compost.
- Inoculates the soils with beneficial and effective microorganisms which detoxify chemically treated soil, feeds the natural soil ecology, and attracts beneficial insects and nematodes.
- Enhances soil fertility and increases plant yield and produce quality.
